XPL + PAD

PARKAY-CERAMIK® COAT

UV-cured coating reinforced with ceramic beads provides extra durability and easy care in demanding environments.

(Available in Weathered & Antique Collections)

PROTECTIVE WEAR LAYER (0.3 mm/12 MIL)

Prevents against excessive wear, tear resistance, and provides superior stain protection. Registered Emboss.

DECORATIVE HD LAYER

Realistic designs impress in High Resolution, creating a unique natural style.

VINYL LAYER

Additional vinyl layer for extra support and stability.

IXPE CUSHION PAD

Provides sound reduction, feet comfort, and easier installation.

STONE COMPOSITE CORE

Exclusive XPR Rigid Core. 100% Waterproof, prevents expansion and contraction, absorbs subfloor imperfections, glueless installation.

BACKING LAYER

High vinyl content layer, provides robust foundation and impact resistance.

Phthalates Free

100% Waterproof

Multi Layer Core

22 MIL (0.55mm) Wear Layer

INSTALLATION INSTRUCTIONS

PARKAY XPL Organics Installation Instructions/Warranty

BEFORE YOU START

1. Read Parkay Floors installation instructions before beginning.
2. Product cannot be used for exterior applications.
3. PARKAY XPL FLOORING has a patented locking system making it ideal for a floating installation. This product must be glued down when used for light traffic commercial applications.
4. Avoid constant exposure to excessive temperatures or direct sunlight for extended periods of time, since this might cause planks to pick, separate or decolorate. Please consider these exposures when choosing your product. Parkay recommends the use of shades.
5. PARKAY XPL FLOORING does not need to be acclimated if stored and installed in a temperate- controlled environment, maintain between 60°F and 85°F. Additional acclimation must be considered when temperatures mentioned above are not met. Store flat and fully supported during shipping and storage. It is not necessary to remove material from packaging while acclimating. Allow the product to condition in the room where installation is to take place at a constant temperature between 60°F and 85°F or 18°C – 29°C, for a period of 48 hours prior to installation.
6. Slight variations in color and structure are designed to enhance the natural appearance of the product. Mixing the planks creates a more uniform appearance. Make sure to shuffle planks from different cartons prior to installation.
7. Check PARKAY XPL FLOORING for possible defects prior to the installation. Complaints can only be accepted before installation. Parkay Floors® will not be responsible, or will compensate for any installation, if the floor was installed having an obvious or even a minor visual defect.
8. In facilities where walkers, wheelchairs (i.e.), residential and or with extended care use, or in facilities with movement of heavy displays, racks, dentist chairs, etc. These types of installations may exert extreme stress and compromise the locking system.
9. Entryways must always be covered with walk off mats and rolling chairs with chair mats.

10. Moisture content on the subfloor must not exceed 5 lbs./1000ft²/24-hr (ASTMF2170), for this product to be installed.
11. Always cover furniture feet with proper materials.
12. Fixed cabinets or heavy objects cannot be installed when performing a floating installation.
13. Do not install this product over carpet.
14. Underlayment is not necessary for collections carrying an attached padding.
15. Transition moldings are required to separate any area exceeding 2,500 square feet or 50 lineal feet.

THE SUBFLOOR

1. Although PARKAY XPL FLOORING planks are water/moisture proof, they are not to be used as a moisture barrier. Your subfloor should be completely dry prior to installation. Keep in mind that constant moisture coming from the subfloor or topically, will cause mold and mildew to be trapped underneath the product, contributing to an unhealthy environment. Parkay Floors® will not warrant any product based on damages caused by excessive moisture. Subfloors presenting vapor emissions between 2.5% to 5% (CM-Method), must install a 6mil Poly-plastic block before laying the cushioned underlayment. All concrete subfloors must use plastic block for extra moisture protection. Parkay recommends Polyguard PRO 6 as an ideal plastic block for extra moisture protection.
2. Subfloors must be structurally sound, solid, stable, level, plumb, and true to a tolerance in plane of 3/16" in 10 feet (4.7mm in 4m). Cracks and holes must be filled with a fast-drying setting cement- based polymer modified patching compound or equivalent. Any unevenness over 3/16" (4.7mm) must be sanded down, leveled or ramped to a 0°. The surface must be totally clean of dirt, oil, glue residue etc. Carpet tackles, staples or adhesive residue should be removed prior to installation. Voids or humps in the subfloor will prevent the planks from locking properly.
3. PARKAY XPL FLOORING can be installed on existing firm floors (Linoleum, PVC), but all floating or textile floors must be removed. When laying the floor over existing ceramic tiles first level with fast setting cement-based polymer modified patching compound.
4. The installer has the final responsibility to determine if the subfloor is dry and leveled enough to begin with the installation.

5. This product has an attached IXPE 1mm underlayment. It must be glued down when used for any commercial application, using a pressure sensitive adhesive. Parkay Floors recommends and warrants their floors only when using Loctbond Advanced 300 Pressure Sensitive Adhesive. Find more information at www.loctbondusa.com

MEASUREMENTS

1. Agree with the client on which direction the floorboards should run since this influences the visual size ratio of the space. Installation parallel to the longest wall or the main light-source is recommended for the best visual effect.
2. Pre-plan the floor by measuring the room first. If the width of the last row is less than 2" (5cm) saw the first and the last plank in equal width.
3. Snap the lines on the substrate to identify the layout reference points. Planks should be set using this reference to ensure boards are aligned and will lock together correctly.
4. In large areas where flooring will span more than 40' long, an expansion gap should be used. Otherwise place expansion space in room-narrowing and in the door-rebate. Cover the expansion space with suitable moldings.

Different production runs

PARKAY XPL FLOORS can have slight color variations in between production runs. Before starting the installation, it is best to check the production run # which is indicated on the label on the carton. If you find that you have cartons from different production runs, it is highly recommended to open cartons and install a mix of planks from each different production run on your floor. This will result in a more natural looking floor. Do NOT install your PARKAY XPL FLOORS over soft subfloors such as carpet, floating floors or foam underlayments, different than the ones recommended by the manufacturer.

The use of pull bar and tapping block is recommended to ensure a successful install.

PARKAY XPL FLOORS provides a very tight fit. Proper care must be used to ensure all seams are tight at end of install. An unprofessional installation or use of improper tools can result in damage to the Click profiles.

INSTALLATION INSTRUCTIONS

First row:

1. Diagram #1: Start with the first plank in the left corner of the room, tongue-side facing out from the wall to the length and to the right on the width. Work from left to right.
2. Diagram #2: Position the following planks as an exact extension of the first one.
3. Cut to fit the last plank of the row. To do this you can use a utility knife to score the surface at the appropriate point and then break the tile over an edge. A laminate cutter or miter saw can be used as well.

1

2

3

4

Following rows:

1. Diagram #3: Begin the second row with the cut-off end to start the next and subsequent rows. Allow at least an 8" stagger for the end seams. For positioning the planks together, starting with the first tile in the row, raise the plank at a 45-degree angle, insert the lengthways tongue into the lengthways groove and lower the plank while holding the two together until they are flat and tightly together. Close the joint using hand pressure, tapping block or pull bar.
2. Diagram #4: Lever the next sheet in place from the front side so that only a very short distance remains for it to be pushed into the lengthways connection.

5

6

7

3. Diagram #5, 6 and 7: Raise the plank slightly and push it into the lengthways tongue, first close to the front connection, then the rest. Make sure seams are tight on ends and sides using pull bar or tapping block before proceeding. Continue the installation to the last row of sheets, as described.

4. How to shorten doorframes: Position a loose plank face down, close to the doorframe, and cut with a jamb saw.

5. People can walk on the flooring immediately after the installation. Remove the wedges. Nail or screw moldings to the wall, never to the floor.

INSTALLATION OVER RADIANT HEATED SUBFLOORS

PARKAY XPL FLOOR Flooring is not recommended to be installed over any electrical radiant heating systems. Only radiant heated system using water are recommended. Max heating temperate must not exceed 81 F. These Instructions must be followed:

Before installing, make sure to test the heating system at its maximum capacity to force out any residual moisture and to make sure it's working properly.

Moisture content on screed must not exceed 1.5%.

Shut down the heating system at least 48 hours prior to installation.

Keep room temperate between 68°F and 77°F during the installation.

After flooring is install, turn on the heating system gradually, from minimum to maximum within 1-hour period.

MAINTENANCE

Clean regularly with a damp mop with a vinyl floor cleaner such as Bona Pro Series Vinyl Cleaner. Do not use excessive water. Remember to clean up spills as soon as possible. Always use chair protectors under furniture and on chair legs. Felt pad protectors are best. Always add floor mats on area where rolling chairs are being used.

25 YEARS RESIDENTIAL / 7 YEAR LIGHT

COMMERCIAL WARRANTY

Our 7 years limited light commercial warranty for PARKAY XPL FLOORING means that for seven years, from the date of purchase from the original owner and first installation of the product, your floor will be free from manufacturing defects and will not wear through when installed and maintained according to instructions supplied with each carton. This warranty applies only to the original end user with a proof of purchase, warranty is not transferable. Floors must have been installed by a licensed and insured professional to be able to process any claim. The guarantee is for replacement or refund of the material only, no labor. Claims for wear must show a minimum dime size area. High-heeled shoes, rolling carts, furniture and chairs without protective pads can damage the floor and are not covered by this warranty.

Warranty covers against: Staining, Wear, Fading as a result of natural or artificial light, damage by moisture from everyday household spills and manufacturing defects. Floor will only be replaced for one of the same monetary value.

If more than 5% of the product pulled out of the cartons is showing defects, stop the installation immediately and contact your Parkay representative. Transition moldings are not covered under this warranty. Scratches and loss of gloss are not considered a wear-through issue. Up to 10% gloss variance is considered completely normal between planks.

This warranty excludes damage by natural disasters. This warranty excludes floors in contact with moisture trapped beneath the floor. The general warranty is pro rata (25 years for flooring). A pro rata warranty is one that provides for a refund or credit that decreases according to a set formula as the warranty period progresses. A claim process takes up to 90 days to process, from the date Parkay is contacted. We require a detailed description with images of the issue that clearly show the problem. Contact Parkay dealer no later than 15 days after the discovery of the defect. Your dealer will arrange for proper inspection and coordinate a resolution of your claim.

Parkay Floors® reserves the right to modify the contents of this warranty at any and without previous notice. Please refer to our website to obtain the latest version of our warranty.

For service under this warranty or technical questions, please go to www.Parkayfloors.com or contact your local retailer.

Describe the problem and in many cases, the retailer can provide you with a solution.

TESTS & CERTIFICATIONS

SCS Global Services does hereby certify that an independent assessment has been conducted on behalf of:

For the following product(s):

Vinyl Tile:

Luxury Vinyl Tile (Maximum thickness: 5.0mm)

Vinyl Compound Plank (Maximum thickness: 12.0mm)

Rigid LVT (Maximum thickness 5.5mm)

Loose Lay (Maximum thickness 5.0mm)

The product(s) meet(s) all of the necessary qualifications to be certified for the following claim(s):

FloorScore®

Indoor Air Quality Certified to SCS-EC10.3-2014 v4.0

Conforms to the CDPH/EHLB Standard Method v1.2-2017 (California Section 01350), effective April 1, 2017, for the school classroom and private office parameters when modeled as Flooring.

Measured Concentration of Total Volatile Organic Compounds (TVOC): Less than/equal to 0.5 mg/m³ (in compliance with CDPH/EHLB Standard Method v1.2-2017)

Registration # SCS-FS-04026

Valid from: June 1, 2020 to May 31, 2021

SCS Global Services is currently the only certification body approved by the Resilient Floor Covering Institute (RFCI) to provide FloorScore® product certification; certified products are only listed on the SCS Green Products Guide, <http://www.scsglobalservices.com/certified-green-products-guide>.

TEST REPORT

No. : XMIN180500866CCM

Date : Jul.16, 2018

Page: 5 of 16

No.	Test item(s)	Test method(s)	Test condition	Requirement(s) of EN 16511:2014 & client's requirements	Test result(s)
16	Resistance to staining	EN 438-2: 2016 Section 26	Specimen: 200mm×180mm×4.5mm, 5pcs	Groups 1 and 2: grade 5 Group 3: grade 4 (as per class 32, 33, 34)	Rating 5: No change (See Annex A)
17	Effect of Simulated Movement of Furniture Leg	EN 424:2002	Specimen thickness: 4.58mm Foot type and applied mass: Type 0 (32kg) Testing speed: 0.20m/s	No visible damage (as per class 32, 33, 34)	X direction: No visible damage Y direction: No visible damage
18	Micro-scratch resistance	BS EN 16094:2012	See Annex B	/	Procedure A: MSR-A1, Procedure B: MSR-B1, (See Annex B)
19	Classification	ISO 10874:2009	See Annex C	See Annex C	Complied with class 32 (See Annex C)

Sample C: C030WD006(3663602563846)

No.	Test item(s)	Test method(s)	Test condition	Test result(s)
1	Micro-scratch resistance	BS EN 16094:2012	See Annex D	Procedure A: MSR-A1, Procedure B: MSR-B1, (See Annex D)

Note: 1. All test specimens were cut from the samples, see the photographs.

2. Dimensional stability, % = (Dimension before exposure to heat - Dimension after exposure to heat)/Dimension before exposure to heat × 100.

Reference distance of X direction is 570mm. Reference distance of Y direction is 140mm.

3. Curling, mm = Dimension after exposure to heat - Dimension before exposure to heat.

4. Testing samples(sample B) for Wear resistance was received in the second time(dated: Jul.12, 2018).

5. Effect of Simulated Movement of Furniture Leg was carried out by SGS-CSTC Standards Technical Services Co., Ltd. GuangZhou Branch.

6. Micro-scratch resistance was carried out by SGS-CSTC Standards Technical Services(Shanghai) Co., Ltd..

TEST REPORT

No. : XMIN180500866CCM

Date : Jul.16, 2018

Page: 6 of 16

Annex A: Result of the staining resistance

Sample Description: Floor(Sample B)

No.	Stain agent		Contact time	Result - Rating
1	Group 1	Acetone	16h	5
2	Group 2	Coffee (120g coffee per litre of water)	16h	5
3	Group 3	Sodium hydroxide 25% solution	10min	5
4		Hydrogen peroxide 30% solution	10min	5
5		Shoe Polish	10min	5

Descriptive numerical rating code:

Numerical rating	Description
5	No change test area indistinguishable from adjacent surrounding area
4	Minor change test area distinguishable from adjacent surrounding area, only when the light source is mirrored on the test surface and is reflected towards the observer's eye, e. g. discoloration, change in gloss and colour
3	Moderate change test area distinguishable from adjacent surrounding area, visible in several viewing directions, e. g. discoloration, change in gloss and colour
2	Significant change test area clearly distinguishable from adjacent surrounding area, visible in all viewing directions, e. g. discoloration, change in gloss and colour, and / or structure of the surface slightly changed, e.g. cracking, blistering
1	Strong change the structure of the surface being distinctly changed and / or discoloration, change in gloss and colour, and / or the surface material being totally or partially delaminated

TEST REPORT

No. : XMIN180500866CCM

Date : Jul.16, 2018

Page: 7 of 16

Annex B

Test Item: Determination of micro-scratch resistance

Sample Description: Panel(Sample B)

Test Method: BS EN 16094:2012

Test Condition:

Rubbing finger: Φ90mm

Procedure A:

Rubbing material: SB 7447

Load: (612±2)g

Cycles: 80

Procedure B:

Rubbing material: SB 7440

Load: (413±2)g

Cycles: 160

Test Result:

Procedure	Sample	Gloss change $\Delta R'$ (60°) (See note 1)	Micro-scratch resistance class (See note 2)
A	B	2.5%	MSR-A1

Procedure	Sample	Appearance	Resistance class (See note3)
B	B	No visible scratches.	MSR-B1

Note:

1. $\Delta R' = (R_i - R_f) / R_i \times 100\%$, R_i is the mean value at initial state, R_f is the mean value after finishing the test.

2. Classification of mean values of gloss change:

Micro-scratch resistance class according to procedure A	I Change of gloss I
MSR-A1	≤10%
MSR-A2	> 10 % to 30 %
MSR-A3	> 30 % to 50 %
MSR-A4	> 50 % to 70 %
MSR-A5	> 70 %

3. According to BS EN 16094:2012 Table B.1, MSR-B1 is the best while MSR-B5 is the worst.

Note (1): Classification scheme (described in ISO 10874:2009):

Table 1 — Classification

Class	Symbol	Intensity of use	Description
		Domestic	Areas considered for residential use
21		Moderate/Light	Areas with low or intermittent use
22		General/Medium	Areas with medium use
22+		General	Areas with medium to heavy use
23		Heavy	Areas with heavy use
		Commercial	Areas considered for public and commercial use
31		Moderate	Areas with low or intermittent use
32		General	Areas with medium use
33		Heavy	Areas with heavy use
34		Very heavy	Areas with intense use
		Light industrial	Areas considered for light industrial use
41		Moderate	Areas where work is mainly sedentary with occasional use of light vehicles
42		General	Areas where work is mainly standing and/or with vehicular traffic
43		Heavy	Other light industrial areas

Annex D

Test Item: Determination of micro-scratch resistance

Sample Description: Panel(Sample C)

Test Method: BS EN 16094:2012

Test Condition:

Rubbing finger: Φ90mm

Procedure A:

Rubbing material: SB 7447

Load: (612±2)g

Cycles: 80

Procedure B:

Rubbing material: SB 7440

Load: (413±2)g

Cycles: 160

Test Result:

Procedure	Sample	Gloss change ΔR' (60°) (See note 1)	Micro-scratch resistance class (See note 2)
A	C	-3.27%	MSR-A1

Procedure	Sample	Appearance	Resistance class (See note3)
B	C	No visible scratches.	MSR-B1

Note:

1. $\Delta R' = (R_i - R_f) / R_i \times 100\%$, R_i is the mean value at initial state, R_f is the mean value after finishing the test.

Page: 14 of 16

2. Classification of mean values of gloss change:

Micro-scratch resistance class according to procedure A	I Change of gloss I
MSR-A1	≤10%
MSR-A2	> 10 % to 30 %
MSR-A3	> 30 % to 50 %
MSR-A4	> 50 % to 70 %
MSR-A5	> 70 %

3. According to BS EN 16094:2012 Table B.1, MSR-B1 is the best while MSR-B5 is the worst.
